SUMMARY

Senior Software Engineer and Full-Stack Developer with **5+ years of experience** designing, developing, and maintaining **enterprise-grade software systems** across telecommunications, banking, and business operations. Strong expertise in **PHP, Laravel, Python, Django, JavaScript, React.js, Angular, Node.js, NestJS, RESTful APIs, microservices, and relational databases**. Experienced in **software architecture, backend engineering, full-stack development, database design, system integration, workflow automation, API development, testing, performance optimization, and technical documentation**. Currently expanding expertise in **Artificial Intelligence (AI), AI-assisted software development, and AI application integration**, combining modern AI capabilities with robust software engineering practices. Proven ability to collaborate with cross-functional teams and deliver **scalable, maintainable, and business-focused software solutions**.

Core Competencies: Full-Stack Development | Backend Engineering | Software Architecture | System Design | RESTful APIs | Microservices | Python Development | AI-Assisted Development | AI Integration | Database Design | Workflow Automation | System Integration | Performance Optimization | Testing | Agile/Scrum | Technical Documentation

PROFESSIONAL EXPERIENCE

Software Developer

[Afghan Telecom Corporation, Kabul](#)

Jun 2025 - Present

- Develop and enhance the **DSL Management System (DMS)** using **Laravel, Livewire, React.js, RESTful APIs, and MySQL**.
- Automate **telecom business workflows** across customer services, technical surveys, sales, inventory, and operational reporting.
- Design and integrate **RESTful APIs and backend services**, improving system **performance, scalability, and maintainability**.
- Collaborate with **stakeholders, QA, MDF, and technical teams** while maintaining **API, workflow, configuration, and deployment documentation**.

Full-Stack Developer

[Ghazanfar Bank, Kabul](#)

Dec 2024 - Jun 2025

- Led end-to-end development of **GB Suite**, an enterprise platform digitizing **HR, Finance, Administration, and Transportation workflows**.
- Developed secure and maintainable enterprise modules using **Laravel, Livewire, FilamentPHP, Tailwind CSS, Alpine.js, and RESTful APIs**.
- Translated business and stakeholder requirements into **automated approval workflows, reporting modules, and operational processes**.
- Designed and implemented **backend services, database-driven workflows, and reusable application components**.
- Prepared **technical documentation, workflow diagrams, and deployment guides** to support internal development and operational teams.

Full-Stack Developer

[Donya International Group, Kabul](#)

May 2022 - Dec 2024

- Built and maintained **CRM, sales operations, and enterprise web applications** with **Laravel, JavaScript, and MySQL**.
- Managed the **marketing platform and multi-brand CRM email workflows** across business operations.
- Developed **scalable REST APIs** and optimized back-end services for **reliability, performance, and maintainability**.

TECHNICAL SKILLS

Programming Languages:

PHP TypeScript JavaScript
Python Java C#

Frameworks & Libraries:

Laravel Livewire React.js
Next.js Node.js NestJS
Express.js Django FastAPI
Tailwind CSS

Databases & Storage:

MySQL PostgreSQL SQL Server
MongoDB Redis

Cloud & DevOps:

AWS GCP Docker Kubernetes
CI/CD Git GitHub Actions
Linux Mattermost Wiki Docs

Architecture & Methods:

Microservices RESTful APIs
gRPC Event-Driven Architecture
DDD Clean Architecture
SOLID Principles Design Patterns
Agile/Scrum Code Review OOP

SOFT SKILLS

Leadership Team Management
Problem Solving Communication
Time Management Adaptability
Critical Thinking
Project Management
Mentoring Strategic Planning
Cross-functional Teamwork

PROFESSIONAL EXPERIENCE

Junior Software Developer

SaveZone Vehicle Tracking Company, Kabul

Sep 2019 - Apr 2022

- Developed and maintained a **Management Information System** for **vehicle tracking and monitoring**.
- Handled **server administration, deployment, troubleshooting, maintenance, and technical support**.
- Supported **government clients**, including the **Ministry of Interior and Ministry of Defense**.

EDUCATION

Master of Information Systems

Kabul University, Kabul

August 2026 - Present

Currently pursuing a Master's degree in Information Systems, with studies covering information systems, software engineering, artificial intelligence, machine learning, information security, software project management, and data management.

Bachelor of Science in Computer Science

Kabul Polytechnic University, Kabul

Jun 2017 - Jul 2021

- Focus: software engineering, full-stack and mobile development, databases, networking, and security.
- Foundation in data structures, algorithms, discrete mathematics, automata theory, and logic.

KEY PROJECTS

ShopX Multi-Vendor E-commerce Platform - 2026

Role-based platform for customer, vendor, and administrator operations, product management, and payments.

Technologies: [Laravel](#) [React.js](#) [MySQL](#) [REST APIs](#)

DSL Management System (DMS) - 2026

- Developed and enhanced an **enterprise telecommunications platform** supporting customer services, technical surveys, sales, inventory, reporting, and workflow automation.
- Implemented **business workflows, RESTful APIs, database-driven modules, and system integrations** for telecom operations.

Technologies: [Laravel](#) [Livewire](#) [React.js](#) [REST APIs](#) [MySQL](#)

GB Suite — Banking Operations Platform | 2025

- Led development of an **enterprise banking operations platform** covering HR, Finance, Administration, and Transportation workflows.
- Implemented **workflow automation, approval processes, reporting, and role-based enterprise modules**.

Technologies: [Laravel](#) [Livewire](#) [FilamentPHP](#) [Tailwind CSS](#)

Donya International Group Marketing Website — 2023

- Developed a **corporate marketing website** showcasing company services, brands, and business operations.
- Implemented responsive web interfaces and database-driven functionality.

Technologies: [Laravel](#) [JavaScript](#) [MySQL](#) [Web Development](#)

Driver Drowsiness Detection System — 2021

- Developed an **AI-powered driver monitoring system** using Raspberry Pi and computer vision to detect signs of driver drowsiness in real time.
- Applied **AI and computer vision techniques** to support driver alertness monitoring and road-safety applications.

Technologies: [Artificial Intelligence](#) [Raspberry Pi](#) [Computer Vision](#) [Embedded Systems](#)

AWARDS

University Graduation

Bachelor of Computer Science

Kabul Polytechnic University — 2021

Imagine Career Program

International career-development program supporting job readiness and professional growth — 2024

Duolingo English Test

Score: 120 out of 160 — 2026

COMMUNITY CONTRIBUTIONS

Jafar Explains

YouTube creator sharing educational content on technology, future skills, personal growth, health, business, and community development.
